

MIX, CONNECT, SPRAY

SO EASY IT'S A SNAP

SNAP N FLOW™
by DeVilbiss

SIMPLE SYSTEM

Provides a more intuitive, familiar method of mixing and spraying paint

SNAP N FLOW™ significantly reduces the number of components (and steps) needed to complete a job.

- A** The unique chambered lid and venting tube design maximizes fluid flow to the spray gun. Lid sizing optimized and available in 15 and 32 ounce cup sizes to handle both small and large jobs. Lids with integrated filters are available in 125- or 200-micron sizes.
- B** The 15 and 32 ounce SNAP N FLOW™ are industry standard sized cups and both versions feature flat bottom designs for easy stirring.
- C** The easy-connect adapter securely attaches the SNAP N FLOW™ lid to the factory inlet of the gravity spray gun. Adapters are available to fit a majority of gravity guns from major gun manufactures.
- D** The sturdy flat lids are used when paints need to be mixed on the shaker. These flat lids are also used for long-term paint storage.
- E** A shaker adapter is used when cup system is placed on paint shaking equipment.
- F** Unique SNAP N FLOW™ plugs are used with the cone-shaped lids to allow the system to be stored upside down keeping the filter wet during paint storage.

HOW-TO GUIDE

SEE IT IN ACTION

Scan the QR code to watch a video on how to use SNAP N FLOW™.

Learn more about SNAP N FLOW™ at snapnflow.com

1

SELECT

appropriate cup and lid for the job, 15 oz/32 oz cup - 125/200 micron strainer lid

2

MIX

product directly in the SNAP N FLOW™ cup, hand stir or shake with flat lid and shaker adapter as required

Manual Stirring

Shaking

3

SNAP ON LID

and ensure 360° perimeter attachment for complete and concentric seal

4

CONNECT AND SPRAY

gun and cup assembly (squeeze trigger, align lid as shown, insert and turn until full contact with lid)

Snorkel

IMPORTANT NOTE

Follow UPS Process

Keep gun and cup assembly upside down prior to spraying

Upside down - attach airline to gun

Purge - pull full trigger (this ensures proper venting-paint will bubble in the cup)

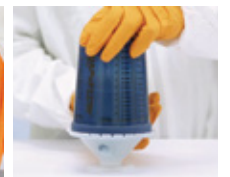

Spray - turn gun over into spray position and begin the paint process

STORAGE OPTIONS

Long Term Storage (Flat Lid)

Short Term Storage (SNF Plug)
